

4 April 1974

MEMORANDUM FOR THE RECORD

SUBJECT: Meeting with Staff of the President's
Executive Interchange Commission

1. During the afternoon of March 28th I received a phone call from Bob Klaus who is on the staff of the President's Executive Interchange Commission. He asked me to come down to see him and a Mr. Cadell the following morning for interviews in connection with my nomination to the Executive Interchange Program.

2. The purpose of the interviews with Klaus and Cadell was to allow them to determine more fully my interests and qualifications so that my resume could be distributed to those participating corporations with which my experience and interests best seem to fit. They also wanted to give me the opportunity to ask any questions I might have. I learned that only about half the nominees of the federal government (50 out of 100) will actually get a position in industry. There are a like number of private sector candidates who will get government positions, making a total of only about a hundred people in the entire program. The Commission staff tries to see that each federal nominee is interviewed by at least two or three of the companies who are participating in the program. It is then up to the nominee to sell himself to one or more of the companies that interviews him.

3. I am to call Mr. Cadell, the assistant executive director of the program, at the end of April when he will let me know what interview arrangements--if any--he has been able to make for me. The Agency is to pay any travel expenses

connected with the interviews and the Commission will reimburse the Agency for all expenses if a position is offered to me and I accept it. Although Cadell and Klaus were talking in terms of starting in a corporate position early in FY 75, that seems optimistic to me. If I don't have job interviews until May, it seems unlikely to me that I could be ready to move in June.
